The BP-9-54 Steel is BlastPro's state of the art hepa dust collection system is recommended for use with the BP-10 and BP-15 Super. The 1,200 cfm dust collector has nine filters, which are automatically cleaned every 13 seconds and the large dust bin enables the contractor to blast for extended periods of time. The BP-9-54 also features two additional 2" vacuum inlets to allow for additional equipment, such as grinders or edgers, to be operated simultaneously. All consumable parts are compatible with Blastrac® parts.

SPECIFICATIONS

Voltage:	208/230/460 3phase
Amperage:	24.2/22/11 amps
Maximum Air Flow:	1200 cfm
Maximum Static Pressure:	23 inches H2O lift
Dust Bin Capacity:	259 lbs.
Dimensions:	57"x35.5"x68"v
Weight:	975 lbs.
Power Cord Length:	75 ft.
Vacuum Hose Diameter/Length:	6"x50'
Use With:	BP-10, BP 15 Super and BP 20-40 Hepa Filtered

ADVANTAGES

- The equipment and all wear parts are made in the U.S.A. and there is typically no lead time when ordering parts.
- The electrical box and electrical components are engineered and constructed by a UL certified electrical contractor.
- Has a higher cubic feet per minute air flow, holds more than 50% more dust, and has three additional filters.
- Uses Hepa filters.
- Filters can be changed through the side access panel which eliminates the need to crawl under the dust collector.
- It has two 2" duct ports which enables simultaneous operation of grinders or other hand tools. The dust collector can be customized to the buyer's specifications (i.e. additional duct ports or different sizes can be added).
- The type W 4/4 electrical cord is the toughest and most wear resistant cord available.

**Production rates are estimates only. Production rates are dependent on job site and application variables.*
