LAVINA 25-LPRO

LAVINA 25L Pro is an upgraded version of the 25N Pro machine, featuring new belt, pulleys, bearings, etc. It can be converted into a 30-inch "low-profile" machine for greater productivity and an easy access under shelves, racks, etc.

Lavina 25L Pro is available in two versions - 208-240V and 380-480V (high voltage). Designed for both dry and wet applications, and should be accompanied by Superabrasive's standard tooling lines (QuickChange metals, Calibra, Nato and V-Harr polishing pads, etc).

CALIBRA ceramic pads feature a special ceramic bond and are designed for the removal of difficult scratches left behind by the metal bond grinding tools.

The Quick Change system is a new tooling alternative replacing Superabrasive's standard 7 and 9 inch button plates for LAVINA Pro, making for a simpler, reusable system for metals.

The V-HARR® pads are Superabrasive's premium pads for concrete polishing. They are also ideal for terrazzo and soft marble floors, and can be used on any planetary movement floor polisher.

NATO® polishing discs feature a special resin formula designed for both wet and dry applications and a unique design with wide channels allowing to work on a cleaner surface and ensuring a quality polish.
