ERMATOR T-12600

the T-12600 is the perfect suction unit for a smaller, central vac system. It is the big brother of the T8600, but is also equipped with autostart, a larger cyclone and a HEPA filter whose surface has been increased from 5 to 10 m². The filter surface is also 65 % larger, and is now 3.8 m²sup. This secures long continuous running without decreased suction power.
